Network Video Fundamentals

Length: 2 days
Format: classroom

Course description
The Fundamentals is a comprehensive course, covering the essentials of network video. Topics such as basic camera installation, image usability, bit rate optimization and video analytics are explored in theory lessons combined with hands-on labs.

Course objectives
You will learn a wide variety of video surveillance basics, such as:

> Camera technology and setup
> Selecting the appropriate camera type and placement
> Ways to save bandwidth and storage
> Intelligent applications

50%
Hands-on & lab exercises

Presentations & demonstrations
50%

Who should attend?
Professionals working with system integration and network video design.

Prerequisites
In order to get the most out of the training, you need to have an understanding of networks in an IP video context.

Before attending Network Video Fundamentals we strongly recommend all students spend 30 minutes on Axis' web-based Basic Networks Training (www.axis.com/academy/web-based.htm) to confirm their network knowledge.
