

Axis Communications Academy

Course description

Axis Perimeter Protection Solution Training

Length: 1 day
Format: classroom

Course description

This 1-day classroom training covers many important aspects in deploying a successful Axis Perimeter Protection Solution. In the training, you will learn about thermal technologies and how to utilize AXIS Perimeter Defender design tool to design a 2D coverage map through hands-on lab exercises. After the training, you will be able to set up and configure AXIS Perimeter Defender and build a total solution with other Axis products.

Course objectives

You will learn:

- > Overview on different Axis solution components
- > Benefits of using thermal technology versus day-night camera
- > Planning and designing perimeter protection solution project
- > Setting up and configuring AXIS Perimeter Defender
- > Build an Axis Perimeter Protection solution with other Axis products

Who should attend?

Engineers working with system design, installation and configuration of perimeter protection solution.

Prerequisites

It is recommended to have attended the Network Video Fundamentals classroom training or basis on how to configure Axis cameras or devices.
