

Product Installation and Configuration

Length: 1 day
Format: classroom

Course description

Through a variety of instructor-led presentations and demonstrations accompanied by hands-on lab exercises, this 1-day course provides advanced camera installation, configuration and management solutions to accurately and efficiently bring camera installations to full operation. Learn the essentials of installation and the features that make it easy. Then practice what you have learned through labs featuring AXIS Camera Management, AXIS T8414 Installation Display, AXIS T8640 Ethernet over Coax Adaptor PoE+, and AXIS T8604 Media Converter on various Axis Network Cameras.

Course objectives

The objectives of this training are for participants to:

- > Understand the variety of installation and configuration options
- > Understand how to use Axis software and installation accessories for more efficient and effective camera installations
- > Anticipate challenges and identify solutions
- > Be able to accurately install and bring large-scale camera installations to full operation

Who should attend?

Industry professionals involved in complete network video installations.

Prerequisites

We strongly recommend that all attendees complete the Network Video Fundamentals training before taking this course. Introductory tutorials, guides, and online courses are also beneficial and can be found in the Axis Learning Center at www.axis.com/academy

Register for this course at www.axis.com/learning/classroom-training/hk

Contact your sales office for more information about availability and price.

Please note: student needs to bring along a notebook computer with administrative right for the training.
