

# Greater school safety and immediate cost savings

with Axis network video solutions.

Far too often we hear about education facilities that have experienced vandalism, violence, or burglary. As a result, valuable resources are lost to cumbersome repairs and investigations. Axis network video solutions enable you to stay focused on your core business – education. It also provides you with a cost-effective and future-proof tool to increase security for students and staff.

Axis' broad range of network cameras provides solutions for all educational environments including hallways, corridors, classrooms, libraries, sports facilities, entrances, exits, parking lots, and other campus areas. Picture a surveillance system that can integrate every location or office and easily connect with your existing network infrastructure, reducing installation and maintenance costs.

## Turning challenges into possibilities

| CHALLENGE                           | POSSIBILITY  |
|-------------------------------------|--|
| Pick-up and drop-off areas          | > Identify individuals with HDTV resolution  |
| Energy costs                        | > Reduce after-hour light usage with Lightfinder technology  |
| Graffiti and vandalism              | > Exterior cameras as a deterrent<br>> Receive alerts when cameras are tampered with<br>> Leverage technologies designed for difficult lighting conditions and auto-tracking |
| Unauthorized access                 | > Automate recording upon doors opening or motion detection  |
| Hallway surveillance                | > Axis' Corridor Format optimizes field of view  |
| Loitering after hours               | > Exterior cameras as a deterrent<br>> Utilize motion detection alerts and recording   |
| Managing cost-effectiveness and ROI | > Leverage existing infrastructure with Axis video encoders<br>> IP video system can run on existing network<br>> Maximize scalability and flexibility                       |

With Axis' proven track record, you can feel confident that we will create the right solution and have the right products to achieve your school surveillance ambitions whatever they may be.

# The right capability for every school need.

## Axis' unique Lightfinder technology

Outstanding performance in difficult lighting conditions

- > High light sensitivity with excellent image quality and noise reduction
- > Color images in environments as low as 0.5 lux
- > Black and white images in environments as low as 0.08 lux

## Axis' Corridor Format

Gives you the right perspective

- > Ideal for situations where a more vertical view is needed
- > Maximizes image quality using a 9:16 aspect ratio
- > Eliminates bandwidth and storage waste
- > Ideal for hallways and corridors

## Vandal and tampering protection

Protection where you need it

- > Stronger, more protective metal housings
- > Curved housing prevents efforts to block the camera's field of view
- > Flush installation

## Active tampering alarm

A new level of intelligent video

- > Automatically detects redirections, block, and covering and alerts the operator of attempts to disrupt normal operation
- > Sends an alarm if camera is defocused or broken
- > Options with alarm function if camera is displaced more than the specified angle

## HDTV network cameras

When every detail matters

- > Higher resolution, more detail, better possibilities for identification
- > Same number of cameras, more coverage
- > 16:9 aspect ratio for more efficient and actionable surveillance

## Squeezed storage

More video, less storage

Axis' Zipstream technology reduces storage by an average of 50% or more in video surveillance.
