

Greater school safety

with Axis network video solutions.

Turning challenges into possibilities

Challenge	Possibility
Pick-up and drop-off areas	> Identify individuals with HDTV resolution
Energy costs	> Reduce after-hour light usage with Lightfinder technology
Graffiti and vandalism	> Exterior cameras as a deterrent > Receive alerts when cameras are tampered with > Leverage technologies designed for difficult lighting conditions and auto-tracking
Unauthorized access	> Automate recording upon doors opening or motion detection
Hallway surveillance	> Axis' Corridor Format optimizes field of view
Loitering after hours	> Exterior cameras as a deterrent > Utilize motion detection alerts and recording
Managing cost-effectiveness and ROI	> Leverage existing infrastructure with Axis video encoders > IP video system can run on existing network > Maximize scalability and flexibility
Video retention	> Axis' Zipstream technology reduces typical storage by 50% or more > Significantly decreases your storage costs
Audio detection	> Axis' Network Horn Speaker provides long-range remote speaking in video surveillance applications

Did you know?

The AXIS A1001 Network Door Controller is the first open, IP-based access controller on the market. That means you finally have the freedom you need with your access control system, so no more being locked into proprietary software and equipment. The AXIS A1001 is an independent unit that can be installed at each door, complete with third-party door accessories such as sensors, door locks and readers. Plus it scales as you do, handling 1 door or over 500 depending on your needs.

With Axis' proven track record, you can feel confident that we will create the right solution and have the right products to achieve your school surveillance ambitions whatever they may be.

Visit www.axis.com/education for more information.

The right capability for every school need.

Image Usability

Outstanding performance in difficult lighting conditions

- > Axis' unique Lightfinder technology maintains outstanding performance in difficult lighting conditions
- > Wide Dynamic Range handles a wide range of lighting conditions in one frame providing forensic capture
- > HDTV will provide higher resolution and extreme detail

Axis' Corridor Format

Gives you the right perspective

- > Ideal for situations where a more vertical view is needed
- > Maximizes image quality using a 9:16 aspect ratio
- > Eliminates bandwidth and storage waste
- > Ideal for hallways and corridors

Vandal and tampering protection

Protection where you need it

- > Stronger, more protective metal housings
- > Curved housing prevents efforts to block the camera's field of view
- > Flush installation

Network Speaker Horn

A new level of intelligent video

- > Simple-to-install outdoor loudspeaker
- > Provides clear, long-range speech for remote speaking
- > Recorded and live audio controls available

Access Control

When every detail matters

- > Door controllers for access management
- > Door stations for audiovisual identification and entry control
- > Indoor and outdoor card readers for customized entry

Analytics

More video, less storage

- > Auto-tracking enables cameras to automatically follow a moving object
- > Sound intelligence to provide additional alerts upon a dangerous noise
- > License Plate Recognition and people counting capabilities
