

# Why Axis network video recorders?

## EASY-TO-INSTALL, RELIABLE RECORDING SOLUTIONS

We are living in a smarter and more integrated world. When developing your security solution, you want the confidence that it will work - without fail. All components (tools, VMS, recorder, cameras, speakers, access control) are tightly integrated with each other to offer an incredible experience. "Out-of-the-box" setup for ease of use and to eliminate installation issues thanks to AXIS Site Designer, Axis recorder toolbox wizard and simplified licensing.

The recorders are preloaded with all necessary software including video management software licenses. With Axis as the single point of contact, you can feel confident that any problem that may arise will be handled quickly and efficiently. All hardware components such as processor, hard drives and graphics card as well as storage capacity are optimized to meet the demands for reliable ultra-high-definition surveillance and comes with a 5-year warranty.

## 6 BENEFITS OF CHOOSING AN AXIS NETWORK VIDEO RECORDER

- 1 A tailor-made recording solution**

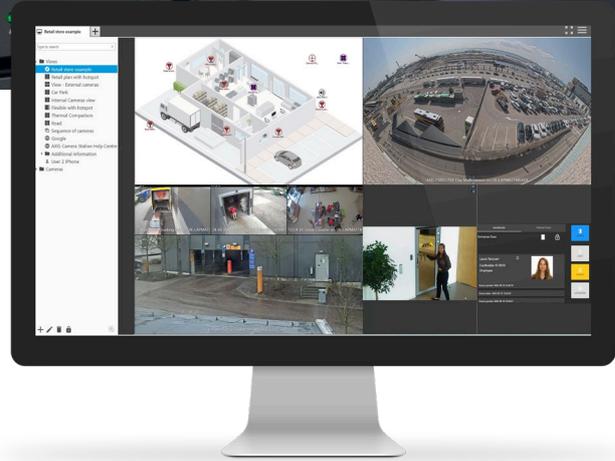

Tailor-made with hand picked components for:

  - > The most suitable form factor
  - > The best components in a surveillance context
  - > Maximum compatibility and reliability
  - > Maximum system stability in many scenarios

  - > Axis NVR recovery to backup and reinstall system
  - > Axis field upgrade kit available for operating system upgrade
- 5 Axis quality, top support and low maintenance**
  - > Axis supports the entire end-to-end solution
  - > Axis keeps the hardware up-to-date for you
  - > Corrections and vulnerability fixes in a timely manner
  - > Extensive support and warranty services
  - > 5-year warranty on all products
- 6 Controlled total cost of ownership**
  - > Simple license model
  - > Initial fee - no additional cost
  - > All included in license
  - > Hardware services included in product

\*AXIS Camera Station requires third-party devices to be ONVIF profile S compliant and verified through the AXIS Camera Station Device Compatibility Tool.

## VALIDATED DESIGN

Whether a quick site survey or a fully-detailed and documented system design, AXIS Site Designer makes it easy to select devices and pick the right accessories and storage solution. When using our tools to build an end-to-end solution, we validate the design every step of the way including storage calculations, bandwidth estimations, licences, power, ports, coverage projections, and more. Once the solution is installed, simply run the verification tool and the site will be pressure-tested to ensure it performs and delivers as expected.

## MORE THAN A RECORDER

### INTEGRATION

Axis network video recorders are out-of-the-box ready solutions, tested and validated with the Axis portfolio to create a perfect integrated solution, suitable both for today and tomorrow's challenges.

### HEALTH MONITORING

The health monitoring portal gives you the possibility to monitor all your Axis devices and get status, such as if cameras and servers are online.

### SERVICE AND SUPPORT

Single point of contact for support, configuration questions and after-sales support, for the entire system (recorder, VMS, cameras and switches).
