

AXIS Companion Card 64 GB

High endurance microSDXC™ card

AXIS Companion Card 64 GB is a high performing edge storage solution optimized for video surveillance and features support for health status monitoring with Axis cameras. Edge storage, supported in most Axis network video products, enables flexible recording solutions with de-centralized video recording, eliminating the need of a server, DVR or NVR. AXIS Companion Card 64 GB optimizes bandwidth usage as video is recorded onboard each camera even when bandwidth is limited or absent. Combined with Axis Zipstream technology, even high quality video can be recorded effectively local on AXIS Companion Card 64 GB.
