## Axis introduces follow-ups to the world's most sold video servers

**Axis Communications today introduced the AXIS 2400+/2401+ Video Servers that transform traditional analog video into high-quality digital images. By adding further enhancements to the world's most sold video servers, Axis continues to strengthen its position in the fast growing network video market.**

The AXIS 2400+/2401+ are follow-ups to the existing range of market leading video servers from Axis. Among the new enhancements are up to three times more storage space for pre-and post alarm buffers, higher performance, increased ability for customizations and an improved architecture that allows for ongoing functionality additions. The new features help the users to migrate existing CCTV-systems to IP-Surveillance as well as provide a foundation for a new network-based security installation.

Transforming traditional analog video into high-quality digital images, the AXIS 2400+/2401+ Video Servers provide a comprehensive single-box solution for video transmission over intranet networks or the Internet. Key application areas are government, transportation, finance, education, retail and industrial companies.

The video server market is rapidly increasing. According to a Frost & Sullivan report (2001), the worldwide market for video servers is worth approximately 200 million USD in 2003 and Axis is regarded as the clear market leader. With the plus versions of the video servers, Axis will further strengthen its position on the network video market.

The 2400+/2401+ will be available through Axis' distribution channels in May, 2003. Product images are available at: [www.axis.com](http://www.axis.com)

### **About Axis**

*Axis increases the value of network solutions. The company is an innovative market leader in network video and print servers. Axis' products and solutions are focused on applications such as security surveillance, remote monitoring and document management. The products are based on in-house developed chip technology, which is also sold to third parties.*

*Axis was founded in 1984 and is listed on the Stockholmsbörsen (XSSE:AXIS). Axis operates globally with offices in 14 countries and in cooperation with distributors, system integrators and OEM partners in 70 countries. Markets outside Sweden account for more than 95 % of sales. Information about Axis can be found at [www.axis.com](http://www.axis.com)*
