## Axis introduces new video server for surveillance

**Axis Communications today introduced a new video server, the AXIS 2411 Video Server, providing streams of high quality video for surveillance use. By adding further models to the world's most sold range of video servers, Axis continues to strengthen its position in the fast growing network video market.**

Axis video servers transform traditional analog video into high-quality digital video streams. The AXIS 2411 has been designed with one main feature in mind, to provide streams of high-quality video for customers requiring a size and cost effective solution, which is providing larger installations with a very competitive cost per channel solution. Key application areas are government, transportation, finance, education, retail and industrial companies.

The AXIS 2411 is a high performing single channel video server designed for professional security and surveillance applications consisting of hundreds of cameras, as well as single camera viewers. Research firm Frost & Sullivan recognizes Axis as a clear market leader in the global network video market, which is expected to reach approximately \$790 million by 2005 (Frost & Sullivan 2001).

The AXIS 2411 will be available through Axis' distribution channels in September 2003. Product images are available at: [www.axis.com](http://www.axis.com)

### **About Axis**

*Axis increases the value of network solutions. The company is an innovative market leader in network video and print servers. Axis' products and solutions are focused on applications such as security surveillance, remote monitoring and document management. The products are based on in-house developed chip technology, which is also sold to third parties.*

*Axis was founded in 1984 and is listed on the Stockholmsbörsen (XSSE:AXIS). Axis operates globally with offices in 14 countries and in cooperation with distributors, system integrators and OEM partners in 70 countries. Markets outside Sweden account for more than 95 % of sales. Information about Axis can be found at [www.axis.com](http://www.axis.com)*
