## **AXIS 70U Network Document Server makes intelligent document sending available to broader market**

**Axis Communications today presented its first network document server using the USB-port for scanner connectivity. The AXIS 70U transforms paper documents into digital format and sends them as e-mail using the widely used Adobe PDF format. This significantly improves the ease-of-use and safety of sending paper documents by using normal e-mail infrastructure.**

AXIS 70U is the perfect tool for sending documents in any medium to large-sized, paper-intensive company that today regularly uses fax or courier. The new AXIS 70U follows up on the successful release of the AXIS 70, which connects to a scanner through the SCSI-port. By using the USB-port for connecting to a scanner, the AXIS 70U addresses a new and larger market for intelligent document distribution.

Faster, cheaper and safer than using fax, traditional mail and courier, the AXIS 70U saves paper documents in digital format (Adobe PDF) and sends them as e-mail. The AXIS 70U makes it easier to distribute documents such as invoices, orders and hotel confirmations. Network document servers also provide a safe way to easily communicate and archive paper-based documents simply by e-mailing them using existing investments in IP-networks. This method relies on the existing e-mail and network infrastructure, created to secure confidential corporate communication. Being able to directly communicate with multiple individuals, and organize and track past e-mails are instrumental in modern communication, and the AXIS 70U and AXIS 70 Network Document Servers provide the most cost-effective way to achieve this.

Using the document server is easy: just insert a document into a scanner, select recipients and press "Send" to distribute the document to any number of recipients over any IP-based network – without any additional distribution costs. The AXIS 70U connects and networks popular office scanners such as Epson, Fujitsu and HP.

AXIS 70U will be available through Axis' traditional channels from mid-October 2002 at the recommended price of € 475. Photos are available for downloading at: [http://www.axis.com/corporate/press/doc\\_photos.htm](http://www.axis.com/corporate/press/doc_photos.htm)

### **About Axis**

*Axis develops solutions for user-friendly and secure communication over wired and wireless networks. The company is a worldwide market leader in network connectivity, with products for office, facility and industrial environments. Axis was founded in 1984 and is listed on the O-list (Attract 40) of Stockholmsbörsen (XSSE:AXIS). With more than 300 employees, and offices in 14 countries, Axis operates globally in cooperation with distributors and OEM partners in some 70 countries. Markets outside Sweden account for more than 95 percent of sales. Information about Axis can be found at [www.axis.com](http://www.axis.com)*

*Axis is a trademark of Axis Communications AB. All other company names and products are trademarks or registered trademarks of their respective companies.*
