## Axis adds outdoor-ready panoramic mini dome with built-in microphone and speaker

**Axis Communications, the global leader in network video, expands its popular AXIS M30 Series with the new AXIS M3037-PVE Network Camera – a vandal-resistant, day/night fixed mini dome that offers panoramic views and echo-free two-way audio communication with built-in microphone and speaker.**

The new AXIS M3037-PVE provides multi-megapixel image quality in versatile panoramic views, including a 360° ceiling view, a 270° corner view, or a 180° view from a wall-mounted position. The compact camera is factory-focused and powered using Power over Ethernet (PoE), making its installation quick and reliable.

The new camera is ideally suited for installations where audio communication is needed, such as at the entrance of a hotel, boutique, restaurant or office building. AXIS M3037-PVE supports Session Initiation Protocol (SIP) for IP phone system integration, allowing operators and persons in the proximity of the camera to communicate with each other, via the IP phone system. Furthermore, the camera supports AXIS Camera Application Platform (ACAP) and AXIS Video Hosting System, as well as open programming interfaces for software integration, including VAPIX and ONVIF.

AXIS M3037-PVE is available through Axis distribution channels.
