Axis introduces new cost-effective indoor pan/tilt/zoom camera with 29x zoom

Axis Communications today presents a cost-effective, easy-to-install indoor pan/tilt/zoom camera with 29x optical zoom and high-quality H.264 video in D1 resolution. AXIS P5532 PTZ Dome Network Camera has an IP51-rated protection against dust and dripping water and is ideal for use in airports, train stations, warehouses, shopping malls and schools.

“AXIS P5532 will appeal to installations that want high zoom, fast pan and tilt performance, excellent image quality and event management features at an attractive price,” says Erik Frännlid, Axis’ Director of Product Management. “AXIS P5532 is designed for easy and reliable installation indoors. It is protected from dust and dripping water, and is powered using High Power over Ethernet.”

With an automatically removable infrared-cut filter, the camera’s day and night functionality ensures that image quality is maintained even in low light conditions. AXIS P5532 can deliver multiple, individually configurable H.264 and Motion JPEG video streams simultaneously. H.264 greatly optimizes bandwidth and storage use without compromising image quality, while Motion JPEG is supported for increased flexibility.

The PTZ camera provides 29x optical and 12x digital zoom with autofocus. With the unique Auto-flip functionality, it can pan 360°—beyond the mechanical stop—enabling an operator to continuously follow an object.

AXIS P5532’s support for High Power over Ethernet (IEEE 802.3at) simplifies installation since only one cable is required for power, video and PTZ controls. A High PoE midspan is supplied with the camera.

With Axis’ unique Advanced Gatekeeper functionality, the camera can automatically move to a preset position to capture, for instance, a vehicle license plate or a person’s face when motion is detected in a pre-defined area and after a set time, return to the home position. When an optional multi-connector cable is used, the camera supports two-way audio and audio detection, in addition to four configurable inputs/outputs for connection to external devices such as sensors and relays. The camera’s built-in SD/SDHC memory card slot enables recordings to be stored locally.

AXIS P5532 provides the market’s most advanced suite of security and network management capabilities. The camera is supported by the AXIS Camera Station video management software, as well as the industry’s largest base of application software through Axis’ Application Development Partner program. AXIS P5532 will be available to order in May 2010. For photos and other resources, please visit www.axis.com/corporate/press/press_material.htm?key=p5532.

About Axis Communications

Axis is an IT company offering network video solutions for professional installations. The company is the global market leader in network video, driving the ongoing shift from analog to digital video surveillance. Axis products and solutions focus on security surveillance and remote monitoring, and are based on innovative, open technology platforms. Axis is a Swedish-based company, operating worldwide with offices in more than 20 countries and cooperating with partners in more than 70 countries. Founded in 1984, Axis is listed on the NASDAQ OMX Stockholm, under the ticker AXIS. For more information about Axis, please visit our website at www.axis.com.
