Axis Introduces a Versatile, Outdoor-ready Surveillance Cabinet for Easy and Sleek Installation of Critical Electrical Equipment

Four different cabinet models combine and protect mains-powered and low-voltage components for outdoor-ready PTZ, fixed and fixed dome IP cameras

CHELMSFORD, Mass. – May 15, 2012 – Axis Communications, the world leader in network video, introduces a unique, outdoor-ready IP video surveillance cabinet that combines and protects multiple electrical system components – such as a midspan, power supply, media converter, surge protector and fuse – in an easy-to-install, sleek design that blends together with Axis network cameras. Any of the four AXIS T98A-VE Surveillance Cabinet Series models can be installed on a wall, pole or building corner, and will protect mains power and low-voltage units from tough weather and vandalism:

- AXIS T98A15-VE to be used in a standalone installation;
- AXIS T98A16-VE to be used with AXIS P13-E Network Cameras;
- AXIS T98A17-VE to be used with AXIS P33-VE Fixed Dome Network Cameras;
- AXIS T98A18-VE to be used in conjunction with a wall bracket for mounting Axis pan/tilt/zoom (PTZ) and other fixed dome network cameras.

AXIS T98A-VE Surveillance Cabinet Series comes with a mounting plate to simplify the step-by-step installation and protect cable attachments. For better installation and improve cost efficiency, the inner compartment with a DIN rail can be split into two sections: one to fit mains power units and a second for low-voltage units that do not require installation by a certified electrician. Axis IP surveillance cameras are then mounted on the cabinet door for a final all-in-one design.

The cabinet is IP66-rated for protection against the ingress of dust and high pressure water jets, as well as IK10-rated for protection against impact and vandalism. An optional electrical safety kit is available, which includes surge protection, a fuse and an alarm-door switch to detect cabinet intrusion or damage.

“This unique surveillance cabinet provides a complete solution for those installers who have been searching for third-party suppliers of connection or electrical-safety boxes,” said Fredrik Nilsson, general manager, Axis Communications, Inc. “AXIS T98A-VE cabinet will be very popular for city surveillance and critical infrastructure installations where a sturdy, vandal-resistant and water-protected box is a must. It will save time and money in the field.”

AXIS T98A-VE Surveillance Cabinet Series is expected to be available in Q2 2012 with an MSRP of \$249 for all models.

About Axis Communications

As the market leader in network video, Axis is leading the way to a smarter, safer, more secure world – driving the shift from analog to digital video surveillance. Offering network video solutions for professional installations, Axis' products and solutions are based on an innovative, open technology platform.

Axis has more than 1,000 dedicated employees in 40 locations around the world and cooperates with partners covering 179 countries. Founded in 1984, Axis is a Sweden-based IT company listed on NASDAQ OMX Stockholm under the ticker AXIS. For more information about Axis, please visit our website www.axis.com.
