Video + Audio:
stop crimes and disturbances with no delay

With the help of video surveillance and analytics, you can play event triggered voice messages or have a guard remotely monitor your premises. The use of audio speakers to "speak" to the suspects allow you to take instant response and deter the undesired activities without any delay.

Enjoy the benefits from a proactive security solution with video analytics and audio deterrence:

> Immediate response and deterrence to the suspected activity
> Reduce costly intervention by guards and police
> Reduce costs due to damages and lost goods
> Mitigate threats and create a safer working environment

Axis network audio solutions are available for a variety of industries and applications. The customers are benefiting from the audio applications in retail, industrial, critical infrastructure, education, smart cities and more.

Smart parking	Intelligent loss prevention

"Sorry that your car is not registered for the car park. Please press the button for assistance."
> Stopping unauthorized vehicles

To prevent misuse of private car parks, an unauthorized car will be notified to leave. Schools, industry plants and enterprises are using the solution effectively to manage their car parks.

"No parking here!"

> Deter parking violations

Avoid on-street car blockages with AXIS Parking Violation Detection. For example, a data center uses the solution to avoid blockage of the entrance traffic.

"Please keep your distance" at the ATM waiting queues.

### > Keep the queue with distance

Using the motion detection application to trigger a voice reminder. The solution avoids shouldering and password stealing resulted in a 28% reduction in ATM attacks. In addition, the speakers are used to respond to homeless people staying in indoor ATM locations.

"Jeans section needs assistance"
> Notify assistance or monitoring

Detect long dwell time and notify a staff to check on the customer or suspect. A retail shop effectively reduces organized crime and 85% reduction of shrinkage.

Smart protection of premises

"No trespassing, please leave the premises now."
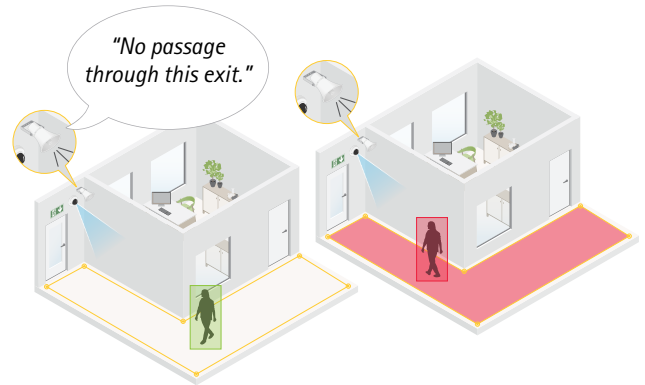

> Virtual fences to guard and deter intruders

Deter intruders with AXIS Perimeter Defender. Oil & energy plants and data centers are protected against intruders with intelligent video surveillance.

"This place is under surveillance. Please keep the area clean."
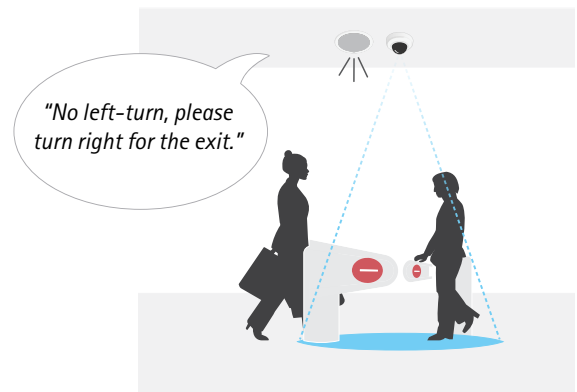

> Virtual guards at unmanned areas

Detect loiterers like smokers and gangs wandering around, the AXIS Loitering Guard will trigger a verbal warning without sending security guards.

Verbal guidance to avoid disturbances

"No passage through this exit."

> Prevent pushing out emergency exit doors

Now you can warn people immediately instead of using signage that doesn't speak. Notifications initiated with AXIS Loitering Guard.

"No left-turn, please turn right for the exit."

> Verbal guide for the right path

Restrict access to confined zones with AXIS Direction Detector and offer verbal guide going to the right path.

Axis offers both indoor and outdoor network speakers that can support an extensive coverage of edge-based applications. You can also use the AXIS C1410 **built in PIR sensor** at entrances/exits for security control.

AXIS C1410 is an all-in-one security & audio device. With a built-in PIR sensor, the device can be used for motion detection to trigger notifications to a VMS or to play pre-recorded messages.

It allows users to remotely warn off intruders before they commit a crime, to deliver instructions during an emergency or to make general announcements. This feature "Audio + motion detection" can be used in several scenarios, for security, safety, and operation purposes.

> Crime prevention at retail stores

Background music at day time

Alarm to suspects break-in at night time

> Guarding access to restricted zones
