

# Which access control management software is right for you?

AXIS Camera Station Secure Entry and AXIS Entry Manager are two end-to-end access control management software options ready to meet your needs. But which one should you choose?

**Let's compare.**

## What is it?

**AXIS Entry Manager**

A standalone access control system with basic integration to video management systems, including AXIS Camera Station.

**AXIS Camera Station Secure Entry**

Unified access control and video surveillance in one software, an all-in-one solution.

AXIS Entry Manager is pre-loaded on AXIS A1001 Network Door Controller. No separate server needed.

Included in AXIS Camera Station stand-alone licenses. Pre-loaded on AXIS S11 and AXIS S22 Network Video Recorders.

**AXIS A1001 Network Door Controller**  
AXIS Entry Manager is included for free on controller.

**AXIS A1601 Network Door Controller**  
Requires one AXIS Camera Station license per controller.

## Who's it for?

**For small size system only**  
Limited scalability and functionality.

**For larger systems**  
Good scalability and advanced features.

## System size

**Qualified number of doors:**

Optimized for 10 doors

Up to 128 doors per server

**Qualified number of cardholders:**

400 cardholders

10,000 cardholders

**Maximum credentials per cardholder:**

1 credential

5 credentials
